Cyber-up Your PC - Cyberpunk 2077 Case modding Guidelines

When creating your design, please keep the following things in mind:

- ❏ Please base your concept on the desktop chassis Alienware Aurora

- ❏ Please be
  aware to not:
  - ❏ Hide the Loop light in front
  - ❏ Head or modify the Alienware head in front
  - ❏ Hide any ventilation areas of the case (so it doesn't block airflow)
  - ❏ Side panels must be closed. Can be modified for windows etc.

- ❏ At least one part of the design has to be/include recycled material (for example, an old circuit board as decoration)

- ❏ The design has to follow one of our style guidelines and feature a megacorporation logo or a gang logo from Cyberpunk 2077

- ❏ In Night City, the rich and poor live right next to each other; make this contrast visible in your design

When sending us 3 images to showcase your own case design, ideally edit them so one shows front/back, one shows both sides and one shows the top of the case.

In case of questions, please reach out to cyberup@cdprojektred.com.
